PROJECT BRIEF

Calligraphy is the art of forming beautiful symbols by hand and arranging them well. It's a set of skills and techniques for positioning and inscribing words so they show integrity, harmony, some sort of ancestry, rhythm and creative fire.

Calligraphy can be taken to expert heights. Calligraphy skills are used in many areas of art and graphics, from greetings card design to tattoo artistry. But you don't have to be a pro to express your creative self and have a pleasant effect on the viewer or recipient of your efforts.

Essentially, there are three main types of calligraphy: Western, Arabic, and Oriental. Within each style, there may be several lettering sub-styles or hands. Seeing examples of these styles can help you perfect your art and get inspired to create something amazing.

Here we are aiming to design a website "QuickCalligraphy" which will provide an easy way to learn calligraphy and provide the basic other details about the art.

Requirement Specification:

The Web site is to be created based on the following requirements.

- 1) The home page must describe the keywords or highlight the calligraphy designs with all navigation links defined.
- 2) The site should provide the brief information about calligraphy as from where it originated etc.
- 3) There should be a well-designed menu with necessary sub menu options.
- 4) There should be various categories (forms and styles) like easy for kids, complex for elders and so on
- 5) There should also be categories of designs as Arabic, Indic, Greek etc(more categories can be added)
- 6) Proper description of the letters and fonts must be added in the website.
- 7) Contact us page: contact us details with location should be displayed using GeoLocation API (eg. GoogleMaps).
- 8) About Us
- 9) Feedback form
- 10) Gallery section should be added.
- 11) Color combination must be uniform throughout the project.
- 12) Navigation must be smooth.

SCREEN SHOT'S:-

❖ HOME PAGE

The screenshot displays the homepage of QuickCalligraphy. At the top, there's a navigation bar with the site name "QuickCalligraphy" on the left and links for Home, Calligraphy, About, Pages, Contact, and Themes on the right. Below the navigation is a large banner with the text "The Elegance of Writing" and "The Art of Calligraphy". A hand is shown writing cursive text on a piece of paper. To the left of the main banner is a smaller inset image showing a hand writing "Thank You" with a calligraphy brush. Below the main banner are two buttons: "Register Now" and "Learn More". Further down the page, there's a grid of four cards: "Modern Lettering" (with an icon of stylized letters ABC), "Font TypeFace" (with an icon of two letters AA), "Community" (with an icon of three people talking), and "Workshop" (with an icon of a workshop setup). At the bottom left, there's a section titled "Experienced Lettering Master" with a "Contact Us" button. On the right side of the page, there's a large image of a hand writing "Thank You" on a piece of paper, with a calligraphy brush and ink bottle nearby.

❖ Calligraphy Page

The Origins of Calligraphy

Ancient Beginnings: Calligraphy as an art form began as early as ancient Egypt and Mesopotamia, where people used reed pens to inscribe symbols on clay tablets and papyrus. Over time, as writing systems evolved, so did the techniques and tools used to create them.

Arabic Calligraphy: Islamic calligraphy emerged around the 7th century, with intricate, flowing designs used to adorn religious texts and architecture. Styles like Kufic, Thuluth, and Naskh became prominent, creating a calligraphic tradition rich in beauty and symbolism.

Eastern Calligraphy: In China, calligraphy developed as an essential cultural art, with styles that valued balance, precision, and expressive strokes. Japanese and Korean calligraphy later adapted Chinese techniques, each developing its own distinctive forms and philosophies, often seen as meditative practices.

Western Calligraphy: In the Western world, calligraphy flourished during the medieval period, when illuminated manuscripts featured elaborate scripts and detailed illustrations. Gothic, Carolingian, and Italic scripts were commonly used in religious and scholarly texts, laying the foundation for modern Western calligraphy.
